Nutley, NJ | (808) 219-9326 | hungsg555@gmail.com | linkedin.com/in/hungle88

FRONTEND ENGINEER | REACT • REACT NATIVE • JAVASCRIPT • TYPESCRIPT • ENTERPRISE APPLICATIONS

## PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building React, React Native, TypeScript, and JavaScript applications, including enterprise product environments. Delivered user-facing workflows across checkout, payments, invoices, dashboards, account flows, order management, and mobile experiences. Strong hands-on background with API integration, TanStack Query, Redux, Nx monorepos, accessibility remediation, automated testing, feature flags, analytics, i18n, and release support.

Authorized to work in the United States without current or future visa sponsorship.

## PROFESSIONAL EXPERIENCE

**Frontend Engineer (UI Developer) - Contractor** | May 2022 - April 2026

Evernorth Health Services (Cigna) - Morris Plains, NJ / Remote

### Frontend Feature Development

- Developed and enhanced 20+ enterprise web and mobile applications across the Express Scripts, Evernorth, and myCigna platforms, delivering customer-facing solutions using React, React Native, TypeScript, and JavaScript.
- Collaborated across 7+ cross-functional product teams, quickly adapting to different codebases, business domains, and Agile workflows while delivering production-ready frontend features.
- Developed responsive, accessible user experiences for checkout, payments, invoices, dashboards, account management, order management, and other customer-facing healthcare workflows.
- Selected to support understaffed and high-priority initiatives, including checkout modernization and payment-related features, helping teams deliver critical releases under aggressive timelines.

### API Integration, State Management & Performance

- Integrated API-driven screens with backend services and partnered with backend engineers to clarify payloads, loading states, empty states, and error-handling behavior.
- Managed server state with TanStack Query, improving caching, request deduplication, loading states, error states, and background refetching across API-driven screens.
- Contributed to frontend refactoring initiatives that improved overall application performance by approximately 20%, based on internal team performance measurements, while reducing redundant API calls, optimizing data-fetching patterns, and eliminating unnecessary re-renders.
- Used Redux for shared UI and workflow state in production applications, including patterns aligned with Redux Toolkit.
- Built shared layouts, modules, and reusable UI components, helping multiple teams work from consistent frontend patterns.

### Quality, Accessibility & Release Support

- Wrote and maintained Jest and React Testing Library tests for frontend features, with project coverage reports typically around 85-90%.
- Fixed accessibility issues found through Axe and Evince, including semantic HTML, keyboard navigation, focus behavior, and WCAG-related UI improvements.
- Used LaunchDarkly feature flags to support A/B testing, gradual feature rollouts, and safe production deployments.
- Supported Jenkins-based CI/CD workflows, QA validation, production checks, and post-release verification.
- Supported Adobe Analytics tracking, i18n content updates, Storybook/MDX documentation, and cross-functional delivery with product, UX, QA, and backend teams.

## TECHNICAL SKILLS

|                     |                                                                                                                                            |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend            | React, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS                                                              |
| State & Data        | Redux, Redux Toolkit patterns, TanStack Query, REST API integration                                                                        |
| Testing & Quality   | Jest, React Testing Library, Axe, Evince, WCAG, accessibility testing, A/B testing                                                         |
| Tools & Platforms   | Nx Monorepo, LaunchDarkly, Jenkins, Git, Jira, Postman, Adobe Analytics, CMS (Contentful, Alfresco)                                        |
| Additional Exposure | Next.js, Angular, Node.js, Express, GraphQL, MySQL, MongoDB, AWS, JWT/OAuth/OIDC, AI-assisted development (Cursor, GitHub Copilot, Claude) |

## EDUCATION

Master's in Software Development - Maharishi International University, 2021
